Cover note

Hi ,

I'm Sushant Chandra, a sound designer and audio engineer based in Bangalore. I run Horizon Audio, which is my independent sound design practice.

My pitch is simple. Give me a brief and I will hand back a finished file. Composition, sound design, voice, podcast production, mix and master. I trained for it (Master of Recording Arts, Macquarie University) and then spent years in live sound, studio recording, radio production and bands, which is where the speed comes from.

The work is easier to hear than to describe. You can hear examples at sushantchandra.com and on SoundCloud.

I'm available now, for a retainer, a contract or a full-time role. If there's a brief on your desk, I'd like to hear it.
